EXAMINER'S STATEMENT FOR REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 1-19 are allowed because the references cited fail to teach, as applicant has, a second non-ontime symbol samples based on the first non-ontime control symbol samples and the ontime control symbol samples, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. El-Tarhuni (US 6201828) discloses a spread-spectrum radio communication system in which transmissions occur with varying amounts of delay and in which the delay of a received signal must be determined in order to despread the signal, a system for refining the initial estimate of delay and for tracking the delay during an ongoing communication by correlating the signal at the estimated delay, an increment earlier than the estimated delay, and the same increment later than the estimated delay, and interpolating the early and late correlations normalized by the correlation at the estimated delay and by the increment to determine a refined estimate of the delay. Baltersee (US Patent Publication 20020037028) discloses a method and a rake receiver for code-tracking in communication systems in general and in code division multiple access (CDMA) communication systems being subject to multipath

fading. Ali (US Patent Publication 20020080862) discloses a Rake receiver suitable for receiving, for example, direct sequence CDMA signals, in which the pilot code used to correlate the received signal in each Rake finger is interpolated prior to the correlation.
